CAREER OBJECTIVE

Artificial Intelligence and Data Science undergraduate with hands-on experience in data cleaning, exploratory data analysis, customer segmentation, and Power BI dashboard development. Seeking a Data Analyst internship to leverage analytical and data visualization skills to generate actionable business insights and support data-driven decision-making.

EDUCATION

B Tech AI & Data Science, Nehru Institute of Engineering and Technology | CGPA: 8.7/10 | 2027

Class XII (CBSE), Palghat Lions School, Palakkad | 88% | 2023

Class X (CBSE), Elegant Public School, Palakkad | 96% | 2020

INTERNSHIPS

Project-Based Internship — Spectrum Softtech Solutions Pvt. Ltd., Kochi

Dec 2025 – Jan 2026 | Data Science Intern (Customer Segmentation Project)

- Implemented K-Means clustering to segment customers using unsupervised ML techniques.
- Performed data preprocessing, feature selection, and EDA to identify customer patterns.

Data Analytics Job Simulation — Tata Group (Forage), Remote | June 2025

- Conducted exploratory data analysis (EDA) to assess data quality and risk indicators.
- Built an AI-driven collections strategy integrating automation and ethical AI practices.

Data Engineering Virtual Internship — AICTE, Remote | Jan 2025 – Mar 2025

- Assisted with ETL workflows and data processing under tight deadlines.
- Generated concise analytical reports to support data-driven decision-making.

Java Full Stack Developer Virtual Internship — AICTE, Remote | Oct 2024 – Dec 2024

- Developed front-end modules using HTML, CSS, and JavaScript.
- Used Git for version control and optimized Java code for better performance.

CERTIFICATIONS

- Google:** Data Analytics, AI Essentials(2024)
- University of Michigan:** Machine Learning with Python(2025)
- IBM:** Unsupervised Machine Learning, Python for Data Science(2025)
- AICTE:** Data Engineering, Java Full Stack Developer(2025)
- NPTEL:** Programming In Java, Data Analytics with Python, Data Science for Engineers(2025)

SKILLS

- Technical Skills:** Python, SQL, Excel, Power BI, Tableau, Data Analysis, EDA, Data Cleaning, Statistical Analysis, Regression, Classification, K-Means Clustering
- AI Tools:** Scikit-learn, TensorFlow (Basic), Keras (Basic), OpenCV (Basic)

PROJECTS

- Customer Segmentation Using K-Means & Power BI** – Segmented customers using K-Means clustering; visualized insights with interactive Power BI dashboards for targeted marketing.
- Mental Health Keyword Analyzer (Python CLI)** – Developed a Python CLI tool to analyze mental health-related keyword intensity in text data.
- Fake Job Detector (ML + NLP)** – Built an ML application to classify job postings as Real, Fake, or Uncertain using NLP-based text features.
